

Breakfast at SPU: A Primer on Artificial Intelligence Ethics

Are you prepared to live and work in the age of AI (Artificial Intelligence)? Join the AI conversation with Dr Bruce Baker, AI and other “exponential technologies” are raising questions that society has not had time to digest. As leaders, what can and should we know about the future?

---Explain how AI leaders define rubrics of robust, ethical AI.

---Discuss moral issues of AI and robotics in our society and personal lives.

---advise how to educate and equip ourselves for work in the digital age

---See how a spiritual understanding of human flourishing offers much needed wisdom for personal goals and business strategies
