

April Topic: Long Term Care - Know your options

Protect your loved ones from the burden of providing your care by making sure it is funded and managed when you need it.

You're invited to join us for a Boeing Retirement-Ready Webinar on
Tuesday April 5th 6:00-6:30PM

Presented by **Michael Sondheim Pacific Financial Solutions**

Nearly 3 out of 4 adults will end up in Long Term Care during their retirement years. You will either risk your savings and everything you've worked hard for to pay for this care, or you will need to plan ahead and set up a long-term care insurance plan. The government and traditional medical insurance does not pay for long-term care. Make sense of your choices and find the right plan and program to protect you and your family from the financial, emotional and physical challenges that arise from a Long-Term Care situation.

Asset Based Long-Term Care-Asset based long term care is one of the fastest growing options for setting up a long-term care plan because it cost you nothing in the long run if you never use it. Most plans will even pay you back plus interest if you cancel your plan and many have additional features such as death benefits which are guaranteed.

YOUR BLN Host is Robert Reichle
