

Hello Fellow BLN Retirees,

I am pleased to introduce our new BLN Executive Retiree Mentorship Chair. We recently changed our retiree database to include a drop down menu of individual's profession while they were at Boeing. The database also includes each member's interests. Many of you have expressed interest in being mentors. With that in mind Quentin will be responsible to reach out to those individuals and see if they want to come along the side of a current Boeing employee and mentor them for a period of time. He will use each individual's profession and match them up with a like individual at Boeing. Below is a summary of Quentin's background.

*Quentin Sisco*

Quentin joined Boeing in 1980 as a Manufacturing Engineer after teaching in the Chicago area for more than three years. His first management position was in 1984 as a Manufacturing Engineering manager. From there he became a General Supervisor of the Developmental Manufacturing factory. Quentin held many manufacturing positions for Boeing Fabrication in Spokane, Fredrickson and Auburn. He also served as the leader of Fabrication's Quality organization. From there, he moved to Propulsion Systems as the leader of Manufacturing and Quality and also the VP-GM for a period of time before retiring in 2015. Quentin was born in Oak Park, Illinois. He attended Northern Illinois University and earned a Bachelor of Science degree in education in 1975 and a Master of Science degree in safety management in 1979. In 1991, as a Sloan Fellow, he earned a Master of Science in Management from Stanford University Graduate School of Business. Quentin is married to Peggy and they have three children. He is active in many community activities including as president of The Carly Stowell Foundation, volunteering for Habitat for Humanity, King Conservation and other community organizations.

Please join me in welcoming him to our group.

Thanks

Ron VanHoy, BLN Retiree Liaison
